🌍 Open to Global Opportunities | Target Regions: India, UAE, & Worldwide

SUMMARY

Experienced SDET-2/QAOps Engineer with **9+ years** in **Software Testing** and **Test Automation** and **3+ years of experience** in **CI/CD, Cloud DevOps, Docker, and Kubernetes**. Hands-on experience leveraging **AI tools** such as **ChatGPT, GitHub Copilot, and Cursor AI** to accelerate **test automation development**, optimize **Selenium frameworks**, generate **API test cases**, debug failures, and improve **CI/CD productivity**.

PROFESSIONAL EXPERIENCE

GlobalLogic 🌐,

09/2022 – Present | Bangalore, India

Senior Associate Consultant Engineer – SDET / QAOps Engineer

Projects: ATVE | D+ Team | STBT:

- Working as a **Senior SDET / QAOps Engineer** responsible for designing, developing, and maintaining **scalable test automation solutions** across **web and hardware device applications**.
- Collaborated with **development, DevOps, and release teams** to integrate automation into **CI/CD pipelines** and improve software delivery quality.

Test Automation & Framework Development:

- Developed and maintained automation frameworks using **Java, Selenium WebDriver, TestNG, Maven, and Page Object Model (POM)** design patterns for ATVE project. And used **Appium** with **JavaScript** in D+ project and **Python** with **STBT** for X-Box in D+ project.
- Automated **end-to-end functional, regression, smoke, and sanity test suites** to improve release confidence and reduce manual validation effort.
- Worked on **CTV's (Samsung Tv, Lg Tv, Fire Tv, Android Tv) automation** using **Appium with JavaScript** for **Tizen, WebOS application testing**.
- Contributed to **Python-based automation activities** for **STBT project**.
- Designed **reusable automation components, utilities, test data handling mechanisms, and reporting solutions**.

QAOps / CI-CD Implementation:

- Integrated automation test execution with **CI/CD pipelines using Jenkins** to support **continuous testing** and faster feedback during development and release cycles.
- Created and maintained **Jenkins pipeline scripts** to automate **build validation, test execution, reporting, and deployment verification activities**.
- Worked with **DevOps teams** to troubleshoot **pipeline failures**, execution issues, environment-related problems, and automation failures.
- Supported **pre-production validation activities** by executing **automated regression suites** before production releases.

Cloud & DevOps Exposure:

- Hands-on experience working with **Docker** for **containerizing automation execution environments** and improving consistency across environments.
- Created and maintained **Dockerfiles** to build automation execution images.
- Worked with **Kubernetes** concepts including **Pods, Deployments, Services**, and basic **deployment YAML files** for automation environment setup.
- Gained practical experience with **AWS Cloud Services** including **EC2, S3, IAM, VPC, Security Groups, RDS, EBS, EFS, ALB, and Route 53** in QA automation and DevOps environments.
- **Provisioned infrastructure** using Terraform over the past 5 months to streamline environment deployment. **Modified existing configurations**, variables, and resources to support evolving project architecture. **Analyzed execution plans** to ensure safe, predictable, and accurate infrastructure updates
- Basic exposure to **Ansible** for **configuration management and automation tasks**.

Release Management & Production Support:

- Participated in **release activities** by validating application builds across **QA and pre-production environments**.
- Supported **release readiness** by analyzing **automation reports**, identifying defects, and coordinating with **cross-functional teams**.

- Performed **root cause analysis (RCA)** for **automation failures and environment-related issues**.
- Worked closely with **developers and DevOps teams** during **deployment cycles** to ensure application stability.

AI-Powered Testing & Automation Improvements:

- Leveraged **AI tools** such as **ChatGPT, GitHub Copilot, Cursor Bot and Cursor IDE** to improve **automation development productivity**.
- Used **AI assistance** for generating **automation code**, debugging failures, optimizing scripts, creating **test scenarios**, and improving documentation.
- **Led development** of AI-driven subtitle verification automation Proofs of Concept (**POCs**). **Resolved critical blockers** in the automation testing pipeline. **Accelerated project delivery** by successfully integrating AI validation tools.

Robosoft Technologies  , Senior Automation Test Engineer 03/2021 – 08/2022 | Udupi,India

- Experienced in **requirement analysis, test scenario design, test case development, defect management, and end-to-end validation** including **Smoke, Functional, Integration, and System Testing**.
- Automated UI and API testing using **Selenium WebDriver, TestNG, BDD Framework, and Postman**, including **test execution, maintenance, defect tracking, and collaboration with development teams**.

Deluxe Entertainment Services  , Test Engineer 03/2017 – 03/2021 | Bangalore, India

- Worked on **web application manual & automation testing** using **Selenium WebDriver, TestNG, Maven, and Data-Driven Frameworks**.
- Developed and executed **functional/regression automation scripts** with **test data handling and automated test reporting**.

EDUCATION

Bachelor of Engineering in Mechanical, Canara Engineering College 08/2012 – 06/2016 | Mangalore,India

SKILLS

Programming: Core Java, JavaScript, Python (Basic)	Automation: Selenium WebDriver, Appium, TestNG, Cucumber BDD, STBT
QAOps: Jenkins, GitHub, CI/CD, BVT, Pre-Deployment Validation	Cloud & DevOps: AWS, Docker, Kubernetes, Ansible, Terraform (Basic), Linux
Monitoring: Prometheus, Grafana, MediaMelon	Cloud Testing: Tv Labs, BrowserStack, HeadSpin, Suitest
AI Tools: Cursor AI, Cursor Bug Bot, GitHub Copilot, ChatGPT, Rovo AI Bot, AI-generated Test Case Design, AI-assisted Debugging	Project Tools: Git, GitHub, GitHub Actions Maven, Jira, Confluence

CERTIFICATES

- ISTQB: In-Progress
- AWS Certified Solutions Architect-Associate certificate 
- AI 202: GLCertified AI Professional - Generative AI 
- DevOps 

AWARDS

Spot Award of the month - May 2026, GlobalLogic	2026
The League Extraordinaire, GlobalLogic	2025
Annual Excellence Award, GlobalLogic	2024
Oscar Award, Robosoft Techonologies	2022
Performance of the year, Deluxe Entertainment Services	2020
